Dear Members:

### Re: TTC's Oral Fluid Testing Process

As you are aware, the Commission has backed down and now changed the method of oral fluid collection to use swabs which do not contain animal by-products. However, we are still concerned that some members may have been forced to compromise their views and were forced to submit samples contrary to their religious or ethical beliefs.

If you or a member you know who has ethical or religious objections to ingesting animal or animal by-products, and you were compelled to submit a sample using the OLD swabs, please fill out the attached form and submit it to Local 113 by email at [correspondence@atu113.net](mailto:correspondence@atu113.net) so that we can address this matter with the Commission.

In Solidarity,

Rick Fox  
Executive Vice-President
